MANOJKUMAR

DATA ANALYST | DATA QUALITY & BUSINESS REPORTING

+91 9150993513 • mkum1095@gmail.com • Chennai, Tamil Nadu • linkedin.com/in/manoj-kumar-s

PROFESSIONAL SUMMARY

Data professional with 4+ years of experience across data collection, enrichment, validation, cleansing, web technology research, and workflow improvement. Skilled in SQL and Excel for organizing datasets, checking data quality, analyzing trends, and preparing reliable information for business reporting. Familiar with Power BI for data modeling, KPI development, and interactive dashboards with hands-on experience in structured web data extraction using JSON crawler schemas and CSS selectors.

CORE SKILLS

SQL:	Joins, GROUP BY, aggregations, CASE statements, subqueries, CTEs, window functions, data validation, transformation
Microsoft Excel:	PivotTables, XLOOKUP/VLOOKUP, IF, SUMIFS/COUNTIFS, data validation, cleaning, trend charting
Power BI:	Power Query, data modeling, DAX measures, KPIs, report design, interactive filters and dashboards
Data & Web Research:	Data collection, enrichment, cleansing, duplicate/missing value checks, JSON crawler schemas, CSS selectors

PROFESSIONAL EXPERIENCE

Data Associate — **WebAmigo** Chennai, TN | May 2024 – Present

- Enrich and validate business and web-derived records, verifying completeness, consistency, and accuracy for downstream analytics.
- Conduct web technology footprint analysis to identify adoption patterns, market presence, and technology stacks across domains.
- Build and maintain JSON crawler schemas with CSS selectors to facilitate structured, repeatable web data extraction.
- Perform systematic data collection, transformation, and quality checks to build clean, dependable reporting datasets.

Data Augmenter — **Zoho Corporation** Chennai, TN | June 2022 – April 2024

- Collected, cleansed, and validated large-scale datasets to ensure consistent and accurate business reporting.
- Utilized advanced Excel functions to analyze records, resolve missing or conflicting values, and produce structured outputs.
- Audited existing data workflows, identified operational gaps, and recommended improvements to boost dataset accuracy.
- Created summary tables and visual charts to communicate key data findings clearly to cross-functional stakeholders.

KEY PROJECTS

Scrap Directory Analytics `PostgreSQL` `Excel` `Power BI` Personal Project

- Designed a relational staging architecture in PostgreSQL to process raw public business directory data for Tamil Nadu.
- Executed data quality protocols covering record integrity, duplicate detection, invalid rating checks, and category mapping.
- Constructing Power BI dashboards to evaluate business coverage, category distributions, and data completeness metrics.

Sales & Business Performance Analysis `SQL` `Excel` `Power BI` Practice Project

- Queried revenue datasets using SQL to analyze product sales performance, regional demand trends, and primary business KPIs.
- Developed interactive report views with DAX metrics and KPI cards in Power BI for executive overview.

EDUCATION

Bachelor of Computer Application (BCA) — **B.S. Abdur Rahman Crescent Institute of Science and Technology** Chennai, TN | Aug 2019 – May 2022
